

Processed Fruit and Vegetables Packaging in Indonesia

July 2024

Table of Contents

KEY DATA FINDINGS

2023 DEVELOPMENTS

Metal food cans dominate in shelf stable vegetables, but eco-friendly brick liquid cartons gaining share

Flexible plastic the main pack type in the packaging of frozen processed vegetables

Manufacturers continue replacing standard can ends with easy-open can ends for consumer convenience

PROSPECTS AND OPPORTUNITIES

Large pack sizes will continue growing over the forecast period due to cost-efficiency

Metal food cans will remain the preferred pack type due to their durability

About Euromonitor International

Euromonitor International is an independent market intelligence provider. Data, insight and analysis stem from in-the-field research spanning 210 national markets.

Content ranges from the in-depth and country-specific, to key strategic themes with a global range and significance. Products cover a comprehensive range of insights and market data, but can be broadly categorised as:

- **Strategy Briefings:** Global or regional in scope, and focussing on the most important themes shaping consumer demand, the key markets, competitive environment and future outlook across a range of industries.
- **Company Profiles:** Analysis dedicated to the world's most significant companies, with detailed insight into their activities, focus of operations, their competitors, their geographic presence and performance.
- **Country Reports:** For an in-depth understanding of specific countries, whether by industry, economic metrics or consumer trends and lifestyles. These reports cover current trends, consumer demand, market potential and future prospects, with country-specific local insight and comprehensive data, unavailable elsewhere.
